Join us the evening of Thursday, May 28, 2009 at 7pm to find out how the Sierra National Forest is proposing to manage motorized public access on roads, trails, and areas in the Forest. During this phone and online chat, you will learn how you can participate in the process and why your participation is important!

During this phone and online chat session, we will share information about:

1) The need and reasons for undertaking motorized travel management planning; 2) The proposed alternatives for managing motorized travel on the Sierra National Forest presented in the Travel Management Draft Environmental Impact Statement (DEIS); and 3) How the public can both comment on the DEIS and get involved in future volunteer efforts to help maintain and improve access within the forest.

Time will also be provided for your questions.

This webinar is part of an outreach pilot. Our goal is to allow you to learn more about this process from the comfort of your home and help reduce the carbon footprint associated with driving to a meeting. We will set aside a small amount of time at the end of the session to hear if you would like to use this type of outreach in the future.

Title:

Sierra National Forest Motorized Travel Management - Navigating the Environmental Process

Date: Thursday, May 28, 2009
